Dear Hiring Manager,

I'm writing to show my interest in the Junior Data Analyst job at BCG X Delivery. I have a Bachelor's degree in Computer Science Engineering/Technology and I'm currently pursuing a Master of Business Administration. I have practical experience in data analytics, machine learning, and artificial intelligence.

I've worked with Python, SQL, and advanced Excel/VBA, which are important for this job. I've also completed projects where I used these skills to solve complex problems and provide useful insights.

What excites me about this role is the chance to work with different teams and clients to find data-driven solutions to their challenges. I'm good at explaining technical concepts in simple terms and paying attention to details. I believe I can contribute positively to your team's work.

I admire BCG X's goal of using technology to make a positive impact, and I'm eager to be part of it. I'm confident that my skills and experience match what you're looking for. I'm looking forward to discussing how I can contribute to your team. You can find my resume attached.

Thank you for considering my application.

Sincerely,

Vinit Mehra
